We introduce different possibilities to use nature for supporting your health. We offer nature studies and hiking trips to everybody, disabled people included.

People interested in technology can participate in energy-reproducing studies as well as in the innovative M-studies. In the Theme park you can also find the therapeutic Sense Garden where you can put into practice your 5 senses - seeing, hearing, smelling, feeling, tasting and support your health.

Kids in Spiral Garden

Pure Water Theme Par

Pure Water Theme Park (PWTP) focuses on the topic of clean water; it is the place where you can get answers to numerous questions: how does clean water spring up+ how does life depend on clean water? What does the quality of water change from? The Theme Park with its centre is situated in Pandivere Upland, in Pandivere and Adavere nitrit-sensitive area in Metsamõisa farm.

This Theme Park bears the ideas of Tonu Ots, a famous Estonian psychologist, "The Creator has hidden the knowledge of the world in the nature – it is our duty to find it." The services we offer to people aim at introducing, using and caring about things happening in the surrounding nature.

To Nature and Hiking Enthusiasts

• The Forest Park dates back to the 16th century, consisting of different tree and vegetal species; is accessable also by wheelchairs. One can find blooming plants, orchids, hazels, a rowan tree with a 50 cm diametre, a lime tree with a "skirt", birches that are about 150 years old. You can sense signs from former manor times.

• The nature trail has been equipped with information boards and trail points with special codes (QR code). One can get extra info about local cultural legends and questions about ground water can also be answered. Like a challenge, you can solve some practical tasks. The length of nature trails is about 45 km.

 Forest huts can be used for observing and listening to nature as well as for staying overnight.

Student programs for active study

 PWTP Active study programs of sustainable development follow the nature studies' curriculum for comprehensive schools.

Make yourself familiar with the programs from our webpage www.metsamoisa.ee/programmid

For People with special needs

- Therapeutic service in the Senses' Garden and in its 6 thematic gardens that helps to develop one's 5 senses: seeing, hearing, smelling, feeling, tasting.
